Residential Patio at Charlotte, North Carolina, USA

The Challenge

At Charlotte, our associate was contacted by a non-resident Indian family who had come to know about our organosilane technology.

The whole patio area was maintenance intensive as a result of fungus formation which asked for periodic cleaning of the patio area.

Project Details:

Name: Residential Patio
Associate: Southscope, North Carolina
Job Quantum: 3,000 ft² Tile Cladded Patio
Products: Zycosil
Period: June 2011

Before Treatment

After Treatment

Zycosil treatment was applied over the entire patio cladding till saturation.

It prevented fungus development over the claddings, thus, enhancing their aesthetic health and at the same time preventing growth of grass in between the tile joints.

The job was carried out by professionally trained application team of our associate to complete satisfaction of the customer.

BENEFITS

Eliminates:

- Fungal Growth
- Rebar Corrosion
- Alkali Silica Reaction
- Carbonation
- Dampness

Reduces:

- Efflorescence
- Dust Accumulation
